

Company Information

Keurig Dr. Pepper is a leading beverage company that was able to combine a hot and cold beverage portfolio at scale, KDP is committed to sourcing, producing, and distributing these beverages responsibly.

KDP is a place for skill development for the future in an environment that enables personal and professional growth.

There is a culture focused on learning at KDP, and this involves access to trainings in Workday, Udemy, and even daily workshops where it is encouraged to ask questions and learn new things.

Co-op Description

The role KDP was primarily on the hot side of the business which involved supporting engineers through a CAD setting or Product Lifecycle Management setting, and this enables an increase in new product development, productivity, and efficiency. It was also important to understand the process behind new product development.

Organizational Change Management involved assisting in setting up an end user support network, enabling functionality in the coming update to work, and by participating in trainings to know what a successful change will entail.
